

# Epithelium Questions

Week of April 27

## Case 58

2

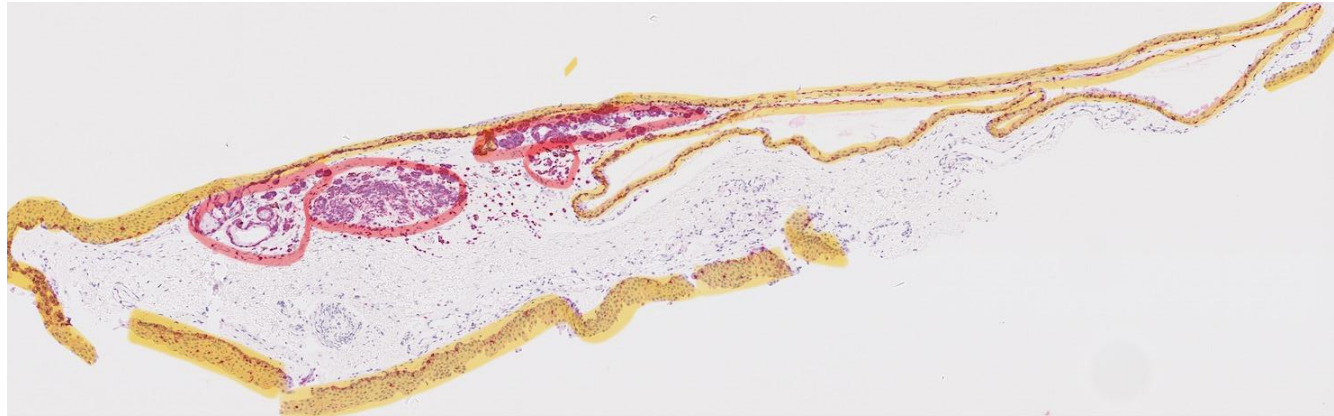

Upper Image: Original Melan Stain  
(chose the melan stain to see the  
clearest - however, this question  
applies to all stains for Case 58)

Lower Image: Marked Melan Stain

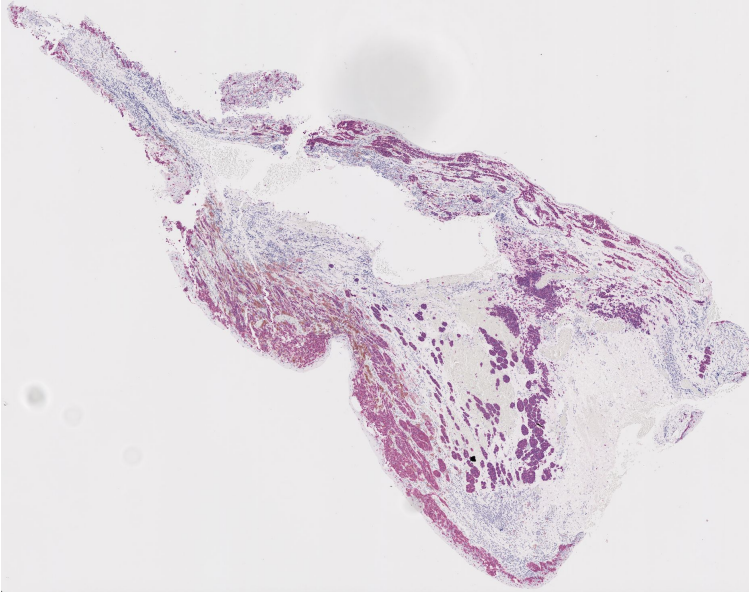

**Yellow** = What I would mark

**Red** = Unsure on how to mark

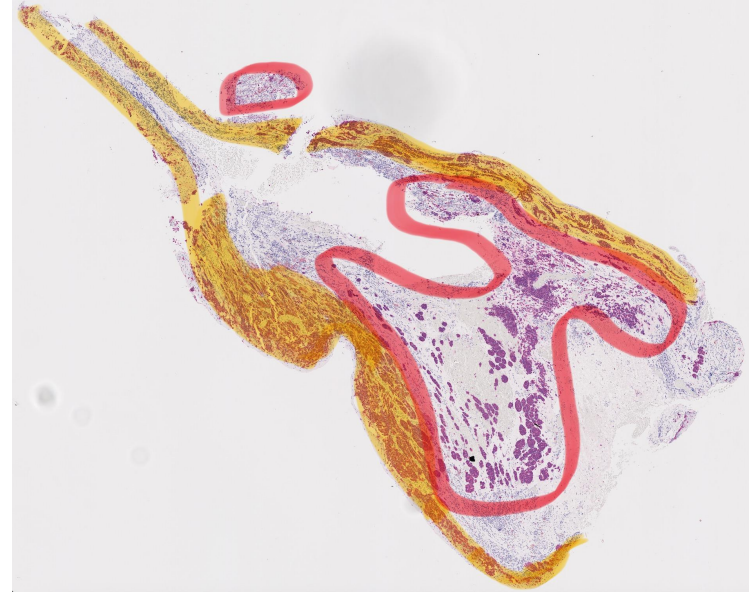

## Case 62 - Unmatched

Left Image: Original Melan Stain  
(chose melan stain to see clearest-  
however, this applies to all stains for Case 62)

Right Image: Marked Melan Stain -  
**Yellow** = What I would mark as epithelium  
**Red** = Unsure on how to mark this part

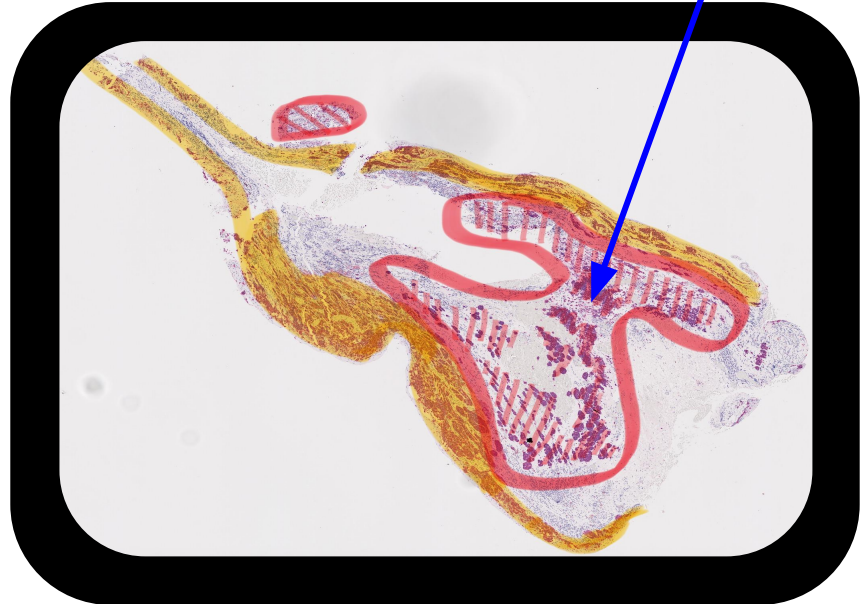

# Overarching Question...

4

As for my red highlights on each slice, would I mark these places as part of the epithelium?

- **If so**, should I mark them the best I can and have it as a detached part of the mask but under the same annotation? (example on the right)
- **If not**, should I just ignore these parts?

THANK YOU
